THE SCHOOL IN ROZZANO

The school is surrounded by a big garden, in which students can train during P.E. lessons.

There are also two big gyms and an auditorium.

The background image shows a well-equipped school laboratory. In the foreground, there are several workstations with white lab benches. On the benches, there are various pieces of equipment including a multi-channel pipette, a rack of test tubes, and several bottles of reagents. A computer monitor is visible on one of the benches, displaying a colorful image. In the background, there are more lab benches, a fume hood with a green hood, and a blue chair. The laboratory has a clean, modern look with black metal frames and white lab benches.

THE SCHOOL IN NOVERASCO

Main areas of the school:

- ☐ Chemistry laboratory
- ☐ The technical room
- ☐ Food technology laboratory
- ☐ Computer lab
- ☐ An arable area

ACTIVITIES

Before Covid-19 pandemic started our school used to organize a lot of activities and projects, the main ones were drama and the school choir. Both activities were extracurricular but the students really liked them.

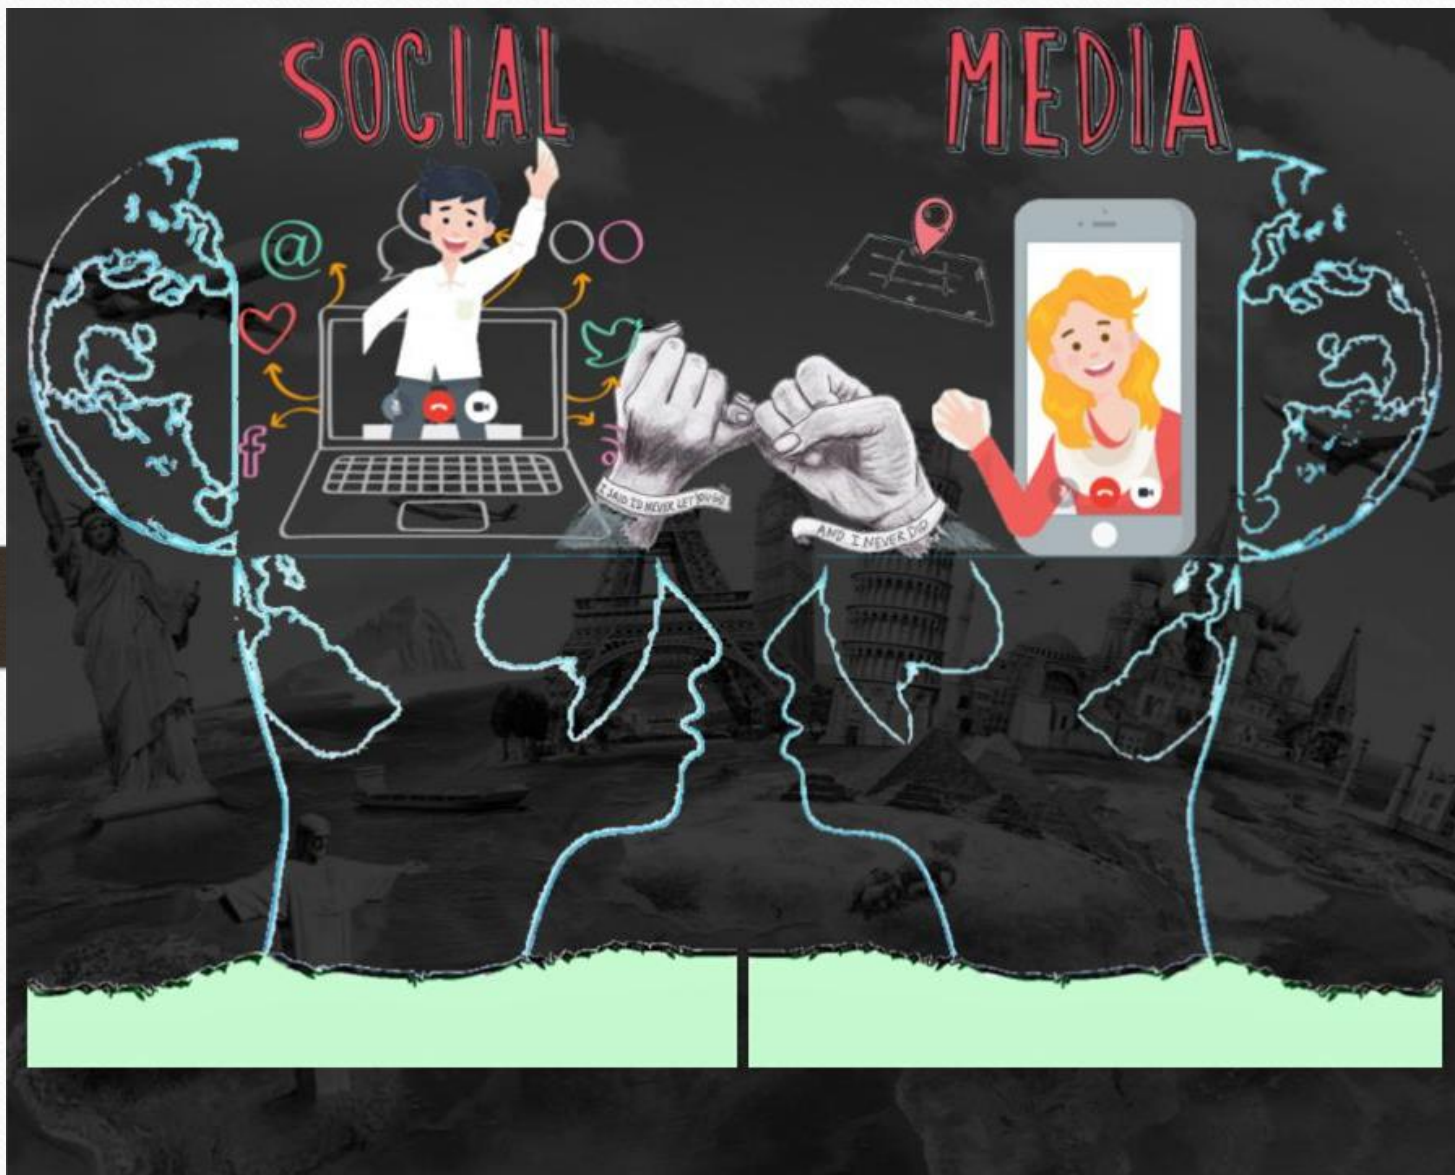

SCHOOL CHOIR

- The best thing about this choir is that everybody can take part in this project (teachers and other school's employees too).
- The choir director is a respected professional that compose himself a lot of the songs that the choir performs. The final concert is always very touching.

DRAMA

- All the students can take part in this project. The main goal of this project is to help to acquire and improve expression ability and to gain a better self awareness.
- The project ends with a play where all the students, parents and teachers are welcome.

WELL-BEING PROJECTS

Our school kept creating new projects to guarantee stimulating activities to the students.

The topics of these projects were mainly **cyber bullying** and **the risks of social medias**.
