

Did you find it useful and / or interesting to participate in this ERASMUS PROJECT?

I found this opportunity really useful in order to improve my level of english and the places visited were really interesting too.

Because it's a way to know new cultures and make new friends.

The program was perfect, couldn't be better!

I have met many people and used English a lot.

Yes, I really enjoyed doing Erasmus because it was a great way to meet new people and learn about different cultures. I also improved my language skills and felt more confident. It was a fun and valuable time!

I found the Erasmus project to be a valuable experience because it helped me develop new skills, broaden my perspectives, and gain a deeper understanding of environmental issues and cultural diversity. The opportunity to interact with people from different backgrounds was enriching and inspiring.

I think it's useful and interesting to participate in this project because you improve your skills and your relationships with the others.

Meet a new culture, visited Italy for the first time and made new friends.

It helped me to get to know my own city better, but above all to meet new people and make friends, I would certainly do it again.

Absolutely meet new people who come from so many different places.

We communicate with people from other countries and do different activities with them.

I already said that the most beautiful part were the friends because it is really good to know new people to spend good time with.

It was very useful to get to know other cultures, languages, uses... I think everyone should participate to this wonderful project.

I like this project as we did many things such as making a song and watching experiments.

We have experienced some incredible moments.

Because i visited a new place and a new culture, i socialized with many people and i had fun.

Because I really enjoy meeting new people and visiting new places.

Because I meet many people and I spend a lot of time with them and it was amazing.

Because is an opportunity for improve english and know new people.

You learn about different cultures and History and you communicate with new people.

Because I was able to speak English and improve it and because I met some kind people.

Because I make Friends.

I think it has been very useful because we have learned about another type of life, food and people, which I thought would be more difficult for me, but it has been an unforgettable experience and I know that this helps us to improve

our level of English but also to create friendships that will last forever. And I would repeat this experience a thousand times more if I could.

Please tell us which moment of the trip to Italy was the most significant for you.

The visit to Gae Aulenti was the most interesting trip that we did, but apart that one evening we went to bowling: even there was amazing and an important moment to stay all.

Going out in the night with everyone to spend a good time and knowing each other better.

My favorite moment was definitely the trip to the center of Milan since It was one of the places in Italy I have always wanted to go to.

When we wrote the song, because it was really funny and I talked a lot with other people, which are now my friends.

The cultural trip in Milan, it was beautiful, even if we walked a lot and now I have cramps, but it was worth it.

The trip to the lake as with my friends.

The most significant moment of the trip to Italy for me was when we went on the rides. It was so much fun to spend time with the other, and enjoying the moment together.

One of my favorite moments was hanging out with all the people at night and also visiting monuments and important places such as the Duomo or the Pinacoteca.

The most important moments for me were all of the moments that I've spent with the people from Spain and Greece.

Pinacoteca di Brera!!!

The last day because I start to talk with more people of the Erasmus I really loved the treasure hunt it was so essential for me because I made new friends in a simple and funny way.

The city center of Milan and the activities we did there.

The treasure hunt was fun, but I think the best thing was to host my Greek partner, Anna!!!

Absolutely the first meeting I had with my host, I think it is the most exciting memory I have collected!

My favorite moment was the treasure hunt because it was fun!!!

The most significant moment was the trip to Milan on Monday.

To me the last day was the most significant because it was the one where I understood who I really got along with and who I wanted to spend most of my time with.

For me the best part of our trip in Italy was the monastery we went and also the treasure hunt even though it's so tiring.

The friday night with all of our friends!

Our last night because we were all together and had fun and many other things but this was perfect!

The travel to Milan.

I think the center of Milan because the Duomo, the gallery, the castle is beautiful and makes me realize that there is a whole world to visit and that all the monuments are incredible and worth visiting and taking care of.

My favorite moment was when we went to the Brera art gallery because we all shared the same passion, especially with Anastasia because we took many photos together.

The trip to Milan was the moment that I enjoy the most.

The aperitif in Navigli.

The trip to the Cathedral.

I think that my favorite part was going to the Pinacoteca of Brera because me and the student I host both like museums.

Have you learned SOMETHING NEW from this ERASMUS PROJECT? about Environmental Awareness and Respect? About Friendship? About you?

Yes, i didn't know different things about environmental awareness and also I got new friends from Spain and Greece.

Yes, this Erasmus project has taught me a lot. It deepened my awareness of environmental responsibility, strengthened my understanding of true friendship, and helped me grow personally by embracing new experiences and perspectives.

Yes, I've learned something about other cultures and I've understood that it's not necessary to know someone for a long time to love them.

Yes, I learned that I have to respect more the nature.

About friends I have met many people.

Yes, I've learned a lot from this Erasmus project. I've learned more about taking care of the environment. I've also made new friends from different countries and understood them better. I've learned more about myself, like how to adapt to new things and communicate well. It was a great experience!

Through this project, I learned more about environmental awareness and the importance of sustainable living. I also gained insights into the value of international friendships and discovered new aspects of myself, such as adaptability and open-mindedness.

I learned new things about environment but I mostly learned new cultures. I made new friends and that's the most important thing yes, i learned a lot about other cultures.

I have learned how to be a more open-minded person and traditions of different cultures.

I've learned what is a real friendship and what is a sustainable travel, and, from now on, i will try to support it.

Respect different cultures and people. Have a stronger connection with nature.

I thought I was much more shy instead I got away even in the midst of strangers and then I met people I don't want to lose now.

I understood that language is just a "mental block" and that you can make friends and meet extraordinary people even outside the box.

Yes, I learned a lot of things about respect of the environment and now I'm more interested in protect it. I improved my english and learned a bit of Spanish and Greek too.

I learned that time flies and that you can build a strong relationship in just a few days or less.

Yes with this project I learned many things. First of all I had the chance to be in a group and compare and communicate with everyone also I got more environmental aware and I learned new things about changing the environmental problems for example eco-friendly travel.

I have learned a lot about myself.

I believe the projects we did improve my environment awareness and respect and also be more sociable person.

I have learned about Italian language!

I think it has allowed me to learn about how important it is to know languages in order to communicate with everyone and thus make an effort and end up improving yourself.

About the environment, having visited so many different places and seeing their charm, I think it makes you think more about what you do and don't do to protect the environment and improve yourself as a person to preserve the planet.

About me and friendship, I have learned that you don't have to be shy, you have to talk to everyone and try to integrate and you will end up making incredible friends that you will never forget and my fear was being alone in an unknown house because I didn't know how I was going to handle it, but now I know that I am capable of adapting and living the experience.

I learned a new language, new habits and new methods of learning.

Yes I learned many things about environmental problem.

Yes I learned the important to be together with others.

I didn't knew that it was so excited to be a participant of an Erasmus project but as a participant I have to say that is a lifetime experience that I will never forget!!!

About environment I didn't learned so much things but about friendships I learned that if you are closed with someone then it's very difficult to say goodbye knowing that maybe you will never see him again.

I'm not sure. I've always tried to be sustainable and this Erasmus helped me to remind me of this. I definitely understood myself better.
